C_C4H62_2408 Questions and Answers Set

Question: 1

You are setting up SAP Customer Data Cloud as an OIDC RP to authenticate users via a third-party OP. What do you require from the OP in order to finalize the setup?

There are 3 correct answers to this question.

- a) Authentication endpoint
- b) Client secret
- c) Scopes
- d) UserInfo endpoint
- e) Access token

Answer: b, c, d

Question: 2

You created a new Data Store type called behavior. You are running the following query:

```
SELECT behavior.data FROM ds WHERE UID = 12345
```

The search is returning no results, although UID 12345 exists in the SSO group. What is your analysis?

Please choose the correct answer.

- a) The command is correct and this user has no data.
- b) The command is incorrect and should be `SELECT * FROM ds WHERE UID = 12345`.
- c) The command is incorrect and should be `SELECT behavior.* FROM ds WHERE UID = 12345`.
- d) The command is incorrect and should be `SELECT * FROM behavior WHERE UID = 12345`.

Answer: d

Question: 3

How can you attach custom logic to login and logout events?

There are 3 correct answers to this question.

- a) By implementing the onLogout function
- b) By implementing the onLogin function
- c) By overwriting the `gigya.accounts.login()` function
- d) By overwriting the `gigya.accounts.logout()` function
- e) By defining new handlers using the `gigya.accounts.addEventHandler()` function

Answer: a, b, e

Question: 4

You are implementing a native registration flow using the mobile SDK as follows:

1. Call `accounts.initRegistration`
2. Call `accounts.register` with the `loginID` and `password`, and `regToken`. Account goes to pending registration status - missing required fields
3. Call `accounts.setAccountInfo` with required fields data
4. Call `accounts.finalizeRegistration`

However, you are getting a permission error when performing step 3. Which parameter(s) should be passed to stop the error?

Please choose the correct answer.

- a) An app key and secret
- b) The `regToken`
- c) The `loginID` and `password`
- d) The `UID`

Answer: b

Question: 5

You need to get a server-side `access_token` from the `getToken` endpoint to perform operations on behalf of any user. What `grant_type` parameter must you use?

Please choose the correct answer.

- a) `token`
- b) `code`
- c) `none`
- d) `any`

Answer: c

Question: 6

You are implementing a website using screen-sets and the Web SDK. Which code statement would determine if a user has an active session?

Please choose the correct answer.

- a) `gigya.accounts.getAccountInfo({callback: function(response) { if (response.errorCode === 0) { //Logged in } } });`
- b) `gigya.accounts.getAccountInfo({callback: function(response) { if (response.errorCode === 200) { //Logged in } } });`
- c) `gigya.accounts.getAccountInfo({callback: function(response) { if (response.statusCode === 0) { //Logged in } } });`
- d) `gigya.accounts.getAccountInfo({callback: function(response) { if (response.statusCode === 200) { //Logged in } } });`

Answer: a

Question: 7

Using the SAP Customer Data Cloud JavaScript Web SDK, you want to add additional behavior data in the store in the form of an array. Which function should be used?

Please choose the correct answer.

- a) `gigya.ds.setSchema()`
- b) `gigya.accounts.store()`
- c) `gigya.ds.store()`
- d) `gigya.accounts.setAccountInfo()`

Answer: c

Question: 8

What must you consider when creating a site group?

There are 2 correct answers to this question.

- a) Sites in the group must have SSO enabled.
- b) Sites in the group must share the same customer accounts.
- c) Sites in the group can NOT use SSO segments if global site groups are used.
- d) Sites in the group must be in the same data center.

Answer: b, d

Question: 9

Which email templates can you manage within the Console?

There are 3 correct answers to this question.

- a) Email Verification
- b) Account Deletion
- c) Account Update
- d) Account Linking
- e) TFA Email Verification

Answer: a, b, e

Question: 10

You are implementing Google social login using the Android SDK. What do you need to include in the manifest configuration?

There are 2 correct answers to this question.

- a) The Google application ID
- b) The Google auth library
- c) The Google client ID
- d) The Google data center

Answer: b, c
