## P\_BTPA\_2408 Questions and Answers Set

### Question: 1

You are designing a solution on SAP BTP for a large enterprise. The company has existing on-premise SAP ERP systems and plans to extend its capabilities using SAP BTP. The solution should include new cloud-based applications and integration with the existing systems.

Which key considerations should you include in your architecture design?

There are 3 correct answers to this question.

- a) Use SAP Integration Suite for seamless data integration between on-premise and cloud systems
- b) Implement a hybrid identity management solution to support both on-premise and cloud-based applications
- c) Design the architecture to leverage SAP BTP's clean core principle by minimizing custom code in the ERP system
- d) Develop the new applications directly within the on-premise environment to reduce complexity
- e) Utilize SAP BTP's extensibility types to build side-by-side extensions

**Answer: a, b, c**

### Question: 2

How are AI-driven capabilities integrated into the SAP Analytics Cloud?

Please choose the correct answer.

- a) By incorporating machine learning models and predictive analytics.
- b) By focusing on customer relationship management.
- c) By offering manual data entry features.
- d) By providing tools for video editing and social media management.

**Answer: a**

**Question: 3**

A global enterprise is implementing SAP BTP and needs to ensure that the architecture supports both real-time analytics and machine learning capabilities. They also need to handle large volumes of data from multiple sources.

What should the architecture include?

There are 3 correct answers to this question.

- a) SAP HANA Cloud for real-time data processing
- b) SAP Data Intelligence for data integration and orchestration
- c) SAP AI Core for machine learning model development
- d) SAP Fiori for user interface design
- e) SAP S/4HANA for transaction processing

**Answer: a, b, c**

**Question: 4**

A customer requires a pricing plan for the SAP Integration Suite service with monthly billing in arrears. Which pricing plan would you recommend to the customer?
